

I CLAIM

1. A camera system for recording images, said camera system comprising:
5 an electronic image sensor for sensing an image;
a digital processing means for processing said sensed image in accordance with
predetermined processing requirements;
a photo width ink jet printer means for printing said processed image on a
surface of ink jet print media, said print media including a magnetic recording surface;
10 a magnetic recording means for recording associated information on said
magnetic recording surface.
2. A camera system as claimed in claim 1 wherein said associated information
comprises audio information associated with said sensed image.
3. A camera system as claimed in claim 1 wherein the printer means prints said
15 sensed image on a first surface of said print media and the magnetic recording means
records said associated information on a second surface of said print media.
4. A camera system as claimed in claim 1 wherein said print media is stored on an
internal detachable roll in said camera system, said camera system comprising a hand held
portable camera device, said photo width ink jet printer being built into said hand held
20 portable camera device.
5. A camera system as claimed in claim 3 wherein said first and said second
surfaces are on different faces of said print media.
